# Release notes for openPEPPOL Validation Artifact and BIS documents, Spring Release 2018

openPEPPOL AISBL

2018-05-07

# Table of Contents

# Release notes for PEPPOL BIS2 v3.6.0

This release from openPEPPOL includes changes to the validation artifacts (VA's) and it's planned that this version will become **mandatory in use from May 14th 2018 12:00 CEST.**

> ℹ️ Core rules should only be considered a help to implementors creating a PEPPOL BIS, making sure that documents are PEPPOL Core conformant. **The core rules should not be used in run time enviroments.**

> ℹ️ Messages should not contain empty UBL elements as these are likely to fail well-formed test and lead to messages being rejected by receiver.

## Changes to BIS documents

*Table 1. Changes pr. transaction*

| Transaction | Rule | Description |
|---|---|---|

## Changes to Validation Artifacts (VA)

*Table 2. Changes pr. transaction*

| Transaction | Rule | Description |
|---|---|---|
| **Order agreement** | EUGEN-T110-R024 | Implementation of rule fixed so it correctly takes PrePaidAmount into the calculation. |
| **Dispatch advice** | BII2-T16-R018 | Context of rule changed to item so that it checks for all lines. |

# Release notes for PEPPOL BIS Billing v3.0.1

> ℹ️ This release from openPEPPOL includes changes to the BIS document as well as the validation artifacts (VA's), and as the PEPPOL BIS Billing 3.0 is optional in use, these changes are valid from the day of publication

## Changes to BIS document

- Correct calculation formula in chapter 9.1.1, see Github issue 46

# Changes to syntax mapping tables

- Correct the structure of the `cac:Taxtotal` element in the syntax mapping.

- Add EN16931 rules to syntax mapping.

- Cardinality set to mandatory for element `cac:InvoiceDocumentReference` as this is the only element in `cac:BillingReference`

- Cardinality set to mandatory for element `cbc:URI` as this is the only element in `cac:AdditionalDocumentReference/cac:Attachment/cac:ExternalReference`

- Change description text from "Document level…" to "Line level…" for allowance/charge elements on line level in the syntax mapping table.

# Changes to validation artefacts

> ❗ Changes apply to both UBL and CII validation rules.

- Removed rule "PEPPOL-EN16931-R050 - Tax exemption reason code MUST NOT be used"

- Incorporated updated validation artifacts from TC434 (amongst other, adding new ICD values).
